

CoolFibre®

Cool, natural fibre for horses

Nutrient Analysis (as fed)

Digestible Energy	11.8MJ/kg
Crude Protein	15.8%
Crude Fibre	22.8%
Crude Fat	5.1%
Lysine	4.8g/kg
Calcium	2.5g/kg
Phosphorus	3.4g/kg
Sodium	0.8g/kg
Magnesium	1.4g/kg
Chloride	0.2g/kg
Potassium	14g/kg
Copper	35mg/kg
Zinc	50mg/kg
Selenium	0.2mg/kg
Manganese	34mg/kg
Iodine	0.62mg/kg
Iron	303mg/kg

CoolFibre® is a blend of CoolStance® premium copra meal, bentonite and soybean hulls. CoolFibre® is 100% natural.

Ideal for insulin resistant horses prone to lameness, laminitis and founder.

A quality Stance Global product.

Sold by Stance Agriculture.

601 Moggill Rd, Chapel Hill Q Australia 4069.

CoolFibre®

Cool, natural fibre for horses

CoolFibre® is a natural, low NSC* cool energy and fibre feed. CoolFibre® preserves insulin sensitivity for a lifetime. Ideal for insulin resistant horses prone to lameness, laminitis and founder.

CoolFibre® is a 100% natural, high-fibre feed, made from a blend of CoolStance® premium copra meal and soybean hulls. CoolFibre® can be used in place of chaff and provides safe energy from oil and fibre for weight-gain, conditioning, performance, breeding and growth.

Benefits of CoolFibre®

- ▶ Low Non-Structural Carbohydrates (<8% NSC).
- ▶ Concentrated source of 'cool' energy from coconut oil.
- ▶ Coconut oil provides Medium Chain Triglycerides (MCTs) to promote gut health.
- ▶ High in digestible fibre for slow-release energy & gut health.
- ▶ Low in starch, so will not cause 'hot' behaviour.
- ▶ Moderate protein level, making it suitable for all classes of horses.
- ▶ Will absorb three times its volume in water.

*NSC stands for Non-Structural Carbohydrates. These are essentially the starches and sugars found in feeds.

Feeding Directions

CoolFibre® can be fed wet or dry. If you choose to soak it, simply place CoolFibre® in 3 times its own volume of water and leave it until it is soft. If feeding CoolFibre® dry, ensure your horse has constant access to ample clean water. As with all dry feeds, some horses eat dry feed very quickly and may choke, so place a large heavy object in the feed bin to slow down the rate of eating. Do not feed dry to horses prone to choke.

Introduce CoolFibre® into your horse's diet gradually over a period of 2 weeks. CoolFibre® can replace chaff but should be fed in conjunction with a source of long fibre (eg. hay or pasture). We do not recommend feeding more than 0.5% bodyweight (eg. 2.5kg/500kg horse) per meal. Breeding, growing and working horses may also need an additional good quality vitamin and mineral supplement.

Horse's Bodyweight	CoolFibre® (kg/day)		
	Horses in good body condition spelling or in light work		Horses needing to gain weight and/or pregnant/lactating or in moderate to heavy work
300kg	0.5	to	3
400kg	0.5	to	4
500kg	1.0	to	5
600kg	1.0	to	6

These feeding recommendations are intended as a guide only. The amount an individual horse requires will depend on the quality and quantity of available hay or pasture, the horse's body condition and workload or required rate of growth.
